Art Unit: 1634

Claims 4-7 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on November 1, 2007.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either one of Kang et al (Cancer Res. 61: 2847 (2001)) or Toyota et al (Cancer Res. 59: 5438 (1999)). Kang et al teaches a correlation between p16 CpG island methylation and gastric carcinoma (*e.g.*, see the Abstract, Figure 2, and pages 2849-2850). Kang et al teaches the use of MSP PCR for the analysis of methylation (see Table 1 and the text on page 2848). Since the primers used by Kang et al contain the nucleotides A, G, and T, they meet all of the limitations of the primers in claim 3. Toyota et al teaches a correlation between p16 CpG island methylation and gastric carcinoma (*e.g.*, see the Abstract, and the Discussion section on page 5441). Toyota et al teaches MSP and Bisulfite-PCR (see the section bridging pages 5438-5439) using the primers of Herman et al (Proc. Natl. Acad. Sci. USA. 93: 9821 (1996)). Herman et al is reference 23 cited in Toyota et al and is cited here only to show that these primers contain the nucleotides A, G, and T and thus meet all of the limitations of claim 3. Thus, the methods of either one of Kang et al or Toyota et al anticipate the claimed methods.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Martinell whose telephone number is (571) 272-0719.

The examiner works a flexible schedule and can be reached by phone and voice mail.

Alternatively, a request for a return telephone call may be e-mailed to [james.martinell@uspto.gov](mailto:james.martinell@uspto.gov). Since e-mail communications may not be secure, it is suggested that information in such requests be limited to name, phone number, and the best time to return the call.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla, can be reached on (571) 272-0735.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
